OMD replacement detector head fan retainer

Product overview

Replacement fan retainer for the Graviner OMD Mk6 and Mk7 detector heads.

The fan retainer holds the Micronel fan assembly in position, inside the detector head during operation.

The fan retainer holds the Micronel fan assembly in position, inside the detector head during operation.

The pulling tool is used during detector maintenance to slowly remove the fan retaining plug by capturing the shoulder and pulling.

Extreme care should be taken not to lose the fan retaining plug during detector cleaning / repair.
