OMD glass cleaner

Product overview

The Graviner approved glass cleaner is used to ensure that the sample chamber glass is free from oil contamination and able to function correctly.

It has been tested by Graviner to ensure that it has no abrasive effect and leaves no residue within the sample chamber glass.

It is an extremely efficient, low foaming cleaner which is classified as non-flammable and nonhazardous.

It is available in 250 ml bottle for hand applications.

Graviner strongly recommend that only our approved cleaning and maintenance products are used to avoid detector head damage.
